1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has a solution if and only if the condition $\alpha + \beta = 1$ is satisfied. In this case the solution is unique and is given by the formula (2).

2. In the second part of the paper the problem of the stability of the solution of the system (1) is considered. It is shown that the solution is stable if and only if the condition $\alpha + \beta = 1$ is satisfied. In this case the solution is unique and is given by the formula (2).

3. In the third part of the paper the problem of the asymptotic behavior of the solution of the system (1) is considered. It is shown that the solution tends to zero as $t \rightarrow \infty$ if and only if the condition $\alpha + \beta = 1$ is satisfied. In this case the solution is unique and is given by the formula (2).

4. In the fourth part of the paper the problem of the asymptotic behavior of the solution of the system (1) is considered.
